

What to Expect: At the end of each semester (Fall, Spring, Summer) NYSG-funded individuals will receive a Qualtrics link to a Post-award Survey which will include a submission of your NYSG Experience Report. Below are the sections of the Experience Report so that you can prepare your narrative report ahead of time/separately. Your mentor and/or affiliate director may wish to review your experience report prior to submission. The Experience Report will be in narrative form with text entry boxes. You will be able to copy/paste your responses into Qualtrics.

NYSG Experience Report

Instructions: The purpose of the NYSG Experience Report is to provide a summary of the activities and the impacts of work funded by NYSG, to support reflection about your professional and personal growth, and to provide formative feedback to NYSG.

Please complete the sections below for the activities that were funded (all or in part) by the New York Space Grant program in the current semester. The wording of the subquestions may change, but the general intent of the section will stay the same.

Questions about the Experience Report should be directed to

nyspacegrant@cornell.edu.

Enter your name and contact information [text entry boxess]

What category of funded work is this report about?

- NASA Center Internship
- NYSG Internship or Fellowship
- Opportunity Grant

Location [text entry boxes]

- Enter the affiliation where this work took place, e.g. the name of the academic institution, the name of the industry partner, the name of the NASA Center
- Enter the zip code of the affiliation location (most likely the zip code where you worked, unless you worked remotely, in which case enter the zip code of the affiliation you reported to)
- Enter your home address zip code

Description [one open text box]

- Provide a detailed description of your work (use language for the general public and should provide connection and/or explanation of why the project or focus matters) ● List the aims/goals/objectives of your work.
- A summary of the current phase, highlight what was achieved: activities, methods or

experiments conducted.

- Your role and key responsibilities in the project (if you work as part of a team, state the role/responsibility of the others and describe collaboration methods e.g. meetings, interdisciplinary work, etc.).

Progress, Challenges, and Next Steps [one open text box]

- Provide a description of progress made and of findings/outcomes.
- Describe any modifications to the work plans (from what was proposed) and state reasons (e.g. financial/human resources, environmental factors)
- Describe any challenges or problems you faced in implementing the work and what you did to overcome the challenges.
- List any new opportunities (e.g. new partnership etc.) that emerged and any collaborations outside of your work location or site.
- Provide a short description of next steps or future directions for the work. ● Provide a short description of next steps or future directions for you (Will you continue with this same work? Are you moving on to other work)?

Impact [each numbered item will have its own open text box]

1. Summarize the impact of your findings/outcomes **to date** (type n/a if not applicable):
 - a. On the field of research/on the industry
 - b. On the institution.
 - c. On the local community.
 - d. On space technology workforce development in New York State
2. Using the map below, select the regions of New York State that were reached or impacted by your work. [The map will display in Qualtrics].
3. Were there any unintended impacts?

Feedback to NYSG [each numbered item will have its own open text box] Provide feedback on your experience with the NYSG. Feedback is essential for identifying areas of improvement to ensure we meet your needs effectively.

1. Explain how the NYSG resources (e.g. mentorship, funding etc.) supported your research/project success or progress
2. What aspects of the experience worked well, e.g. application process, logistics of payment, mentorship?
3. Describe what did not work well and provide 1-2 recommendations to NYSG for improvements.

Reflection [each numbered item will have its own open text box]

Reflect on your experience of your NYSG- funded research/project.

1. What were the most significant things you've learned from this experience?
2. What challenges changed the way you approach research/engineering/project management?
3. If you could restart the research/project, what would you do differently?

4. How have you grown personally and professionally?
5. How has your NYSG-funded experience contributed to your preparedness for NASA-STEM careers or opportunities?
6. How has this project/research influenced your interest in STEM, NASA or future career goals?

Artifacts

Upload or provide links to any supporting evidence of your work outcomes. This may include: photos of fieldwork, labwork, prototypes, team activities; conference presentations or posters; abstracts of published/draft manuscripts; abstracts from conference/symposium; reports; outreach materials; workshop flyers; media coverage. For each item, provide a short description/caption including: title/activity/event name; date; short explanation of what it represents (e.g. [poster/presentation/paper] on [title/activity] presented at [conference/activity], [Month, YYYY]).

[Opportunity Grants only]**Budget Reconciliation and Reflection**

Provide an explanation of how the awarded budget compared to the actual expenditures for the project. Enter as many lines as needed.
